CONTI+

# CONTI+ salina

Hybrid kitchen faucets for high and low pressure

# Smart innovation

## Fully electronic operation for maximum convenience

CONTI+ is synonymous with premium quality and sophisticated technology, just like the new hybrid kitchen faucets in our CONTI+ salina range. The fully electronic operation and adjustable settings make them the ideal solution for modern kitchens.

The series is available in KS10 (high pressure) and KS30 (low pressure) versions. With its modern IR sensor and ergonomic handle, the CONTI+ salina can be operated both manually and touch-free – for all-round convenience!

The built-in soft jet aerator rules out annoying splashes in every situation. Thanks to a damper integrated in the aerator, the flow rate increases so smoothly that the water jet remains virtually splash-free, even from greater heights.

Whether operated mechanically or electronically, via Service APP or the CNX water management system, the CONTI+ salina KS10 and KS30 kitchen faucets are impressive with their numerous functions and are the ideal solution for all public, semi-public and commercial kitchens.

# All-round talent

## Numerous functions for modern kitchens

Hygiene, innovation, safety and convenience combined! The CONTI+ salina KS10 and KS30 kitchen faucets are a revolution for the sink, as all functions can be electronically adjusted.

The spout's 300° sensor activation range is particularly innovative, fully electronically programmed, without having to spend time dismantling the faucet. This means that the water flow and sanitary rinse can only be triggered electronically when the spout is in the programmed swivel range – for both convenience and safety.

The new fixing nut (long version) has been specially developed for tight situations and simplifies installation. The CONTI+ salina kitchen faucet with its high spout and minimalist design can be easily fixed in place by hand and firmly connected in just a few moments. No longer any need to fiddle around with bulky tools under the work surface – installation made simple.

The hybrid kitchen faucets naturally offer additional functions, such as cleaning stop, electronic setting of water running time and sanitary rinse.

All functions can be programmed manually using the built-in touch control panel in the sensor ring, or digitally via the CONTI+ Service APP or CONTI+ CNX water management system.

## Technical details

CONTI+ salina KS10 and KS30 hybrid faucets with single-lever mixer and IR sensor operation. Modular monobloc, robust metal housing, chrome plated.

| | |
|---|---|
| Versions: | KS10 high pressure \| KS30 low pressure |
| Battery: | 4 x 1.5 V alkaline AA batteries, service life of up to 4 years |
| Mains operation, exposed design: | 230 V / 6 V plug-in power supply unit |
| VARIOconnect: | Single and multiple power supply |
| Operating pressure: | 0.3 – 10.0 bar |
| Flow rate: | approx. 7.4 l/min (3 bar) |
| Pressure hoses: | 450 mm |
| Angle valve connection: | G 3/8 |
| Strainers: | 0.5 mm mesh width |
| Sensor sensitivity: | Continuous automatic self-calibration |
| Sensor range: | Activation of object detection (approx. 250 mm) via proximity sensor (approx. 50 mm), water run-on time and sensor sensitivity adjustable via touch control |

*Illustration CONTI+ salina KS10 high pressure. CONTI+ salina KS30 low pressure is connected with a total of 4 hoses.

## Dependable & innovative

Hygienic, smart shower room and washroom concepts to improve quality of life have been the hallmark of the CONTI+ brand for 50 years.

With our innovative technologies, broad product portfolio and comprehensive range of services, we offer optimum solutions to meet all our customers' needs for new build and refurbishment projects. Impressive, flexible all-round expertise.

From advanced electronic and mechanical shower systems, washbasin faucets and urinal controls through to washbasins, as well as complete washroom equipment and water management systems, we take an integrated approach to all products and system solutions, with a strong focus on sustainability, hygiene and reliability. As a result, the CONTI+ brand is respected among design engineers and architects as a professional partner.
